Preface to the Second Edition.

WE have much pleasure in submitting the Second Edition of our Illustrated Catalogue. A perusal of it will show that we have spared no pains or expense in its production, and we trust that the same success will attend it as accompanied the First Edition.

Notwithstanding the fact that we have more than doubled the number of Illustrations, it has been found impossible to include all our patterns, as we are constantly adding to their number.

We specially invite personal inquiry as to requirements not shown in this book, as we believe that we are in a position to produce any design in Cast-Iron of a quality and at a price that will compete with the very best makers.

We make our grateful acknowledgments to the Public, the Architectural Profession, and our Customers generally, for their liberal support and aid in the past.

A. C. HARLEY & CO.
